Professional Summary

Highly skilled Software Engineer with 3 years of experience in full-stack development, specializing in designing, implementing, and optimizing robust `API`-driven `software` systems. Proficient in leveraging `Git` for collaborative development and expertly troubleshooting complex architectures, I am poised to deliver advanced problem-solving and technical support as a Tier III Service Desk `Engineer`. Adept at maintaining high-availability environments and streamlining `software` operations to enhance system reliability and performance.

Technical Skills

- * **Version Control:** Git, GitHub
- * **APIs:** REST APIs, REST API Design, Microservices
- * **Languages:** JavaScript (ES6+), TypeScript, Python, HTML5, CSS3
- * **Backend:** Node.js, Express.js, Django, JWT, Passport.js
- * **Frontend:** React.js, Redux Toolkit, Next.js, RTK Query, MUI v6, Zod, React Hook Form, ApexCharts, i18next, Vite, Tailwind CSS
- * **Databases:** PostgreSQL, MySQL, MongoDB, Sequelize ORM
- * **Tools & Platforms:** Postman, Figma, Azure Static Web Apps, ESLint, Prettier, Vitest
- * **Methodologies:** Agile, Scrum, Code Review, Technical Documentation

Experience

Software Engineer | FastBeetle (Logistics & Delivery Startup) | Srinagar, India
Aug. 2024 – Apr. 2026

- * Architected and implemented critical `API`-driven backend `software` services for Rider, Merchant, and Customer applications, integrating payment gateways to ensure secure, real-time transactions.
- * Optimized core `software` dashboards, reducing average page load time by 70% through advanced query optimization and caching strategies, directly enhancing user experience and operational efficiency.
- * Engineered a highly efficient `software` module for automated zone assignments, which cut manual effort by 90% and saved multiple `engineer`-hours weekly through systematic process improvements.
- * Developed OrderSnap.in, a full-stack dropshipping `software` platform, applying best practices in `API` integration and secure authentication (JWT + Passport.js) for robust system functionality.

****Full Stack Developer**** | ElySpace (Software Agency) | Baramulla, India

Aug. 2023 – Jul. 2024

- * Delivered complex client SaaS and e-commerce `software` projects, expertly integrating `REST API`s and ensuring responsive UI/UX across diverse platforms.
- * Managed end-to-end `software` feature delivery within Agile sprints, demonstrating strong project ownership and collaboration from requirements gathering to deployment and client handoff.
- * Proactively resolved backend `software` bottlenecks and optimized deployment pipelines, consistently maintaining high system availability and performance in production environments.

****Full Stack Intern**** | Yarikul Infotech | Srinagar, India

Mar. 2023 – May 2023

- * Developed a real-time matrimonial `software` platform using Django and Python, integrating live chat to boost user engagement by 20%.
- * Contributed to expanding product offerings by developing custom `software` solutions, including WordPress plugins and a Python-based utility.

Projects

****Remote Job Agent**** | Python, CrewAI, Gemini 2.0 Flash, APScheduler, FPDF | GitHub

Aug. 2024 – Present

- * Engineered end-to-end 3-agent AI automation system (Scraper → Curator → Cover Letter) using CrewAI 0.5.0; scrapes 15+ job boards, ranks by quality, uploads to Google Sheets, and generates AI-powered cover letter PDFs — runs hands-free every Mon & Thu via APScheduler.
- * Designed 7-point quality scoring algorithm and URL deduplication engine; integrated Google Sheets API with batch processing and Gemini 2.0 Flash LLM with API retry resilience for personalized cover letter generation.

****CRM Application**** | Django, MySQL | GitHub

2023

- * Built a customer relationship management system with reporting dashboards, contact management, and analytics to support business decision-making.

****Music Controller**** | React, Django, Spotify API | GitHub

2023

- * Collaborative real-time playlist voting app integrating the Spotify API; enabled group music sessions with democratic queue management.

Education

****B.Tech in Mechanical Engineering**** | University of Kashmir Srinagar | Srinagar, India
